Dhruthik S Gowda

Software Engineer | Android, Full-Stack, AI/ML
Bengaluru | +91 7892403563 | dhruthik2004@gmail.com | linkedin.com/in/dhruthik-s-gowda-4643aa225 | github.com/Dhruthik0

SUMMARY

Software engineer (B.Tech ISE, CGPA 9/10) with three internships (software, AI, cybersecurity). Led R&D for a production Android app that cut agent setup cost by 90%; builds full-stack, ML, and LLM apps.

EDUCATION

SJB Institute of Technology, Bengaluru | B.Tech, Information Science and Engineering — CGPA 9/10 | 2026

- Coursework: Data Structures and Algorithms, OOP (Java), DBMS, Operating Systems, Computer Networks

Class XII: Base PU College (83.3%, 2022) | Class X: RNS Vidyaniketan (91%, 2020) — Bengaluru

EXPERIENCE

KocharTech | Software Development Intern | Gurugram and Amritsar (on-site) — Jul 2026 – Present

- Led R&D for Phygital's Android agent app and proposed its hybrid React Native architecture (web app in a WebView, calls native on the Daily WebRTC SDK), reusing 80–85% of the existing code; in production with the platform's agents, cutting agent setup cost by 90%.
- Built the typed WebView-to-native bridge, login reuse through Android's shared cookie store, and a platform-independent call-lifecycle hook (extracted from ~1,700 lines of web code) that prevents duplicate rooms and leaked calls.
- Shipped native screen share, chat, pinning, waiting-room admission, synced SVG annotations, auto-recording, and audio routing; patched react-native-webrtc for TextureView rendering and wrote ~300 tests.
- Built a headless Shopify Hydrogen storefront for a 3D-printing service on the Storefront, Customer Account, and Admin GraphQL APIs, with signed STL/OBJ/3MF uploads, three.js volume estimates, draft-order quotes, and UPI payments.
- Unblocked login from slow CRM sync; fixed tenant config, export filters, SonarQube issues, and CI tests in Agile/Scrum.

Edutainer-PAT Technologies | AI Intern | Bengaluru — Jan 2026 – May 2026

- Built and trained an automated voice and chat bot in Python (Pandas, NumPy, Scikit-learn, TensorFlow).

National Information and Cybersecurity Council (NICC) | Student Intern | Bengaluru — Nov 2023 – Jan 2024

- Selected through an entrance exam for this government (MeitY) cybersecurity internship; learned penetration-testing methodology across reconnaissance, scanning, exploitation, and post-exploitation.
- Used Nmap for network scanning, Metasploit for exploitation, and Wireshark for packet analysis, applying them in vulnerability assessment to strengthen defenses.

PROJECTS

Telora: Android voice and SMS gateway (prototype) | *NestJS, Kotlin, Asterisk, LLM APIs* — github.com/Dhruthik0/Telora

- Android handsets act as SIP-to-cellular gateways (Kotlin foreground service, Linphone, TelecomManager) for a NestJS/Asterisk backend with an STT, LLM intent-extraction, and TTS pipeline on BullMQ.

Phishing URL Detector | *Python, scikit-learn, PyTorch, FastAPI* — github.com/Dhruthik0/phish-detector

- Random Forest + char-level PyTorch CNN on ~96k URLs; the CNN scored 0.998 ROC-AUC, 0.978 F1 (held-out).

HistoWay: AI road-trip audio guide (prototype) | *Python, LLM APIs, Whisper, PWA* — github.com/Dhruthik0/HistoWay

- LLM narration grounded in Wikipedia, with rule and LLM fact-checks; offline PWA with in-browser Whisper.

Chat-trace: Chrome extension | *TypeScript, React, Zod, Playwright* — github.com/Dhruthik0/Chat-trace

- MV3 extension mapping ChatGPT follow-ups to sources; 100% core coverage, ~200 unit + 22 e2e tests.

More projects — github.com/Dhruthik0

- Offline Encrypted Intercom (Kotlin, BLE, AES-GCM); Varoza, live marketplace (MERN); Emotion Detection (FastAPI, DeepFace); OTP AutoFill extension (OAuth 2.0 PKCE); FinLedger (Express, PostgreSQL); Resume Screener (MiniLM); Hostel Food Management (Java, JSP); INDO-LINK (React, Node.js, MySQL); Car Rental DBMS (SQL).

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, Kotlin, Python, C, SQL
Mobile and frontend: React Native, Android (Kotlin, foreground services, MediaProjection), React, Shopify Hydrogen
Backend and data: NestJS, Node.js, Express, FastAPI, REST, GraphQL, Socket.IO, PostgreSQL, MongoDB, Redis
AI/ML: scikit-learn, PyTorch, TensorFlow, Pandas, NumPy, LLM APIs (Gemini, Ollama), Whisper
Security: Nmap, Metasploit, Wireshark, Burp Suite, OWASP Top 10, JWT, OAuth 2.0 PKCE, AES-GCM
Tools: Git, Docker, GitLab CI, SonarQube, Jest, Playwright, Linux, Agile/Scrum

CERTIFICATIONS AND ACHIEVEMENTS

- Ethical Hacking and Cyber Security, National Information and Cybersecurity Council (NICC, MeitY); NPTEL: Programming in Java, Cloud Computing; Coursera: AWS Cloud Technical Essentials; won CODE HUNT (VTU).
